

# Linotype Library Font Collections

This document contains the following two lists of fonts:

1. Linotype Library Gold Edition 1.7**	September 2002	see page 2
2. Linotype Library Website Fontlist 1999	February 1999	see page 32

\*\* This old version 1.7 is presently – October 2005 – still sold by Linotype Library GmbH.

Since laymen cannot spot forged fonts (Public prosecutors and criminal court judges may study the report *"The Funny Font Forging Industry"* - <http://www.sanskritweb.net/forgers/forgers.pdf>), those who want to buy a Linotype font should insist that Linotype supplies an expertise by an independent lawcourt forgery expert guaranteeing that the Linotype font you intend to purchase is not a forgery. If the Linotype foundry does not supply full warranties, you should not buy any Linotype fonts: *"I would recommend to obtain full warranties from the foundry that the typefaces do not infringe any rights anywhere in the world"* (Niel Ackermann of Hewitsons Solicitors).

Furthermore, those who buy a Linotype font should know that the Linotype Library GmbH secretly, i.e. without informing you, inserts your private address and other private data into the font bought by you:

```

Since October 2005 Linotype distributes free of charge the font management spyware „FontExplorer X“ (see <http://www.linotype.com/fontexplorerX>). With such spyware, it is easy to collect private data about the font users. Those who do not want that their private data (e.g. private address, bank account number, credit card number etc.) are secretly inserted, as shown above, by Linotype into the fonts purchased should avoid to buy any Linotype fonts, and those who do not want that Linotype collects private data about your person should avoid to use any spyware, and those who do not want to buy any forged typefaces should insist that the Linotype Library GmbH supplies – prior to purchase – an expertise by an independent typeface expert guaranteeing that the font you intend to buy is no forgery. If the Linotype Library GmbH claiming to be "The Source of the Originals" refuses to give you this guarantee of originality by an independent criminal court expert, you should avoid to buy Linotype fonts.

Furthermore, many fonts sold as "Linotype" fonts, are in fact fonts made by other foundries. For instance, the "Gold Edition 1.7" totalling 3880 fonts comprises 922 ITC fonts (= 23.8 %). During the past 5 years, the designers of these ITC fonts were brushed off by Bruno Steinert, who runs the Linotype outfit, whenever they asked for royalties. On 1-Dec-2004, Erik Spiekermann wrote at <http://www.typophile.com/forums/messages/30/54811.html>: *"Either my earlier post on this topic got lost or censored. So I repeat: Linotype have not been paying any fees to the ITC designers up until now. ... Altogether that means no license fees whatsoever for 5 years."*

See also these separate documentations:
