

Softmaker MegaFont XXL – Part 2

Detailed Listing of all 5835 Cuts of the Five Most Important Font Groups

This second file [megafont2.pdf](#) complements the first file [megafont.pdf](#). In this file we list all 5835 cuts of the five most important font groups. The other groups "Outline", "Shadow", "Antique" and "Random" (roughly 4000 cuts), which were mechanically generated by Softmaker, are not listed in this second file.

For the important Adobe and URW core fonts we refer to page 2 of the first document file [megafont.pdf](#).

Note: The fonts of the MegaFont XXL CD were forged by Martin Kotulla by the "Linotype Method" (see "The Funny Font Forging Industry" <http://www.sanskritweb.net/forgers/forgers.pdf>). Especially, Kotulla forged the copyright notices of the 5835 fonts listed below by always inserting the year "2002" as "year of first publication" (compare § 506 c USA Copyright Law: Criminal offenses: Fraudulent copyright notice).

Ulrich Stiehl, 15-Nov-2004
