

„Key Fonts 1222“ by tewi

This CD with title „Key Fonts 1222“ and trademark **Softkey** was sold by the Munich publisher **tewi**. All forgeries contained on this CD were made by the font forging outfit Southern Software Inc. (SSi), described in our large file „Fonts by Southern Software“ (<http://www.sanskritweb.net/forgers/ssi.pdf>). The „Key Fonts 1222“ contains the forged fonts in both PostScript Type 1 and TrueType font format. Below we list the data of the PostScript Type 1 fonts.

In order to demonstrate how the font forger Paul King (see [ssi.pdf](#)) forged the „year of creation“ dates, the following table is sorted by the „Year of Creation“ stated by the font forger himself in the font files. The „Key fonts 1222“ collection contains 1316 fonts (not 1222 fonts, as falsely stated on the CD cover), and by the „Year of Creation“ dates ranging from 7/25/95 to 9/3/95 (25th July to 3rd September 1995), forger Paul King claims to have „created“ the programs (= written the PostScript Type 1 programs) of 1316 fonts in 40 days (27.07.95 – 03.09.95), i.e. 33 PostScript Type 1 programs per day ($1316 : 40 = 33$). Even a large team of programmers would be unable to write 33 PostScript Type 1 programs per day.

We come to the same conclusion, if we analyse the font collections of the major players (Linotype etc.), i.e. by analyzing the „Year of Creation“ dates, we can prove that font forging companies do not write font programs (which would be a necessary requirement for the copyrightability of the font programs).

Ulrich Stiehl, Heidelberg, 27-June-2005

List of SSi Fonts sorted by „Year of Creation“

Note: The „Year of Copyright“ field containing the entry „Copyright nnnn Southern Software, Inc., All Rights Reserved“ was shortened by us to „Copyright nnnn“. The „Year of Creation“ field containing „Generated by Fontographer 4.1 mm/dd/yy at hh:mm AM or PM“ was shortened by us to „mm/dd/yy at hh:mm AM or PM“.
